

Entegard® | 

YOUR CHOICE FOR HEALTHY POULTRY

Based on its expertise as a pioneer and global leader in lysozyme, Bioseutica has developed Entegard® an innovative solution to the animal feed industry, designed to overcome the challenges of raising livestock without antibiotics (RWA). Entegard® solutions are specifically formulated to improve growth performance and gastrointestinal functionality and promote the overall health of farmed animals. Its mode of action stems from lysozyme, the active component derived from natural source (egg white). The special formulation gives Entegard® its performance benefits. Entegard® products can be readily administered via feed or drinking water, at the required concentration levels.

➤ WHY ENTEGARD®

- Entegard® improves feed conversion ratio (FCR) in poultry in RWA operations
- Entegard® promotes clearance of microbial debris, improving gastrointestinal health
- Entegard® enhances feed efficiency and growth performances indices
- Entegard® supports the digestive functions and overall health

➤ ENTEGARD® IS EASY TO USE

Entegard® is available in two product formulations:

- Entegard® WS: A dry powder formulation, which is readily soluble in water. It can be administered simply by mixing in with mash feed, or by dissolving in the drinking water. It can also be administered as post-pellet spray.
- Entegard® PLUS: An encapsulated formulation with high thermostability, suited for addition to feed premixes prior to pelletization

ENTE GARD® is produced with highest standards that guarantee traceability to source.

Entegard® WS | 

HELPS TO RAISE YOUR FARMED ANIMALS WITHOUT ANTIBIOTICS

- **PACKAGING:** Lined 5Kg bag-in-box or 20Kg bags
- **STORAGE:** In original packaging and protected from moisture. Store at room temperature, below 35°C
- **SHELF LIFE:** Up to 24 months at ambient temperature when stored in original packaging and protected from moisture

STOCK SOLUTION PREPARATION

➤ FOR APPLICATION WITH A 1:128 WATER PUMP

Entegard® | 

IMPROVED GUT HEALTH FOR BETTER PRODUCTION PARAMETERS

BROILERS

- REACH TARGET WEIGHT TO MARKET IN LESS DAYS
- ENHANCES GROWTH PERFORMANCE
- IMPROVES FEED CONVERSION RATIO
- BETTER NUTRIENTS ABSORPTION FOR STRONGER BIRDS

LAYERS

- INCREASES LAYER PRODUCTIVITY & LIFESPAN
- REDUCES LAYER MORTALITY
- ENHANCES YOLK AND SHELL COLOURATION
- REDUCES EGG BREAK LOSSES
