

**Product**                      **Affi-Avidin**  
**Affinity purified egg avidin derivative**

**Batch #**                      BA250401                      **Manufacturing date**      May 2025  
**Retest date**                May 2027                      **Storage**                      2-8°C  
**Analysis Nr**                16/25

Test	Specifications	Results
Appearance and colour	Sand yellow to reed green liquid	Conform
Activity (HABA) assay	≥ 4mg avidin/ml	10 mg avidin/ml

**Source:**                      Chicken egg white

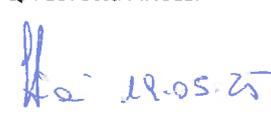

**Preparation:**              Prepared by chromatography from egg white. The Avidin is chemically altered to give a lower isoelectric point

**Storage condition:**      Store in original package, refrigerated at 2-8°C; preserved with 0.05% w/v of sodium azide

**Shipping condition:**     Ambient temperature

**Notes:**                      For research use only. Not intended for clinical use

**Analysed by/date**      QC – Alessandro Calizzi                      **Approved by/date**      QA Loretta Ariozzi
